

# ALBANY

## Bookshelf Speaker

Having a choice of proven technologies gives KLH a clear advantage. The Albany is anything but a “bookshelf version” of our tower speakers, because we use the same acoustic suspension principles invented by Henry Kloss himself. Albany, by the street of the same name, brings improbable sound from an affordable loudspeaker. It is a 2-way acoustic suspension design, featuring woven Kevlar drivers with powder-coated die-cast aluminum baskets, braided tinsel leads, custom designed crossovers, an anodized aluminum tweeter with linear response faceplate, and much more, and all in real wood veneers.

### SPECIFICATIONS

#### Albany Bookshelf Speaker
