

QUINCY

3-Way Floorstanding Speaker

This the middle offering, named fondly after Quincy Street, the birthplace of the Model Nine electrostatic loudspeaker, and is anything but middle-of-the-road when it comes to performance. The Quincy is a 3-way bass-reflex design, featuring woven Kevlar drivers with powder-coated die-cast aluminum baskets, braided tinsel leads, custom designed crossovers, an anodized aluminum tweeter with linear response faceplate, and much more, and all in real wood veneers. The Quincy is a rare combination of beauty and brawn, with unparalleled sonic detail at an unexpected price.
