## STRATTONS

KLH Stratton 10 and 12 subwoofers were designed in America, made in Canada, and shake rooms around the world. Stratton subwoofers are focused on bringing a heart-pounding, low-frequency bottom end to your system so your floor standing or bookshelf speakers can focus on perfecting the high and mid-range frequencies. They are made with sleek black-carbon polyglass-coating, treated paper, Kevlar, CSX, and fiberglass.

The Stratton 12-inch subwoofer has a 200-watt amplifier with 500 watts of dynamic power that delivers some serious bass! Its smaller sibling, the Stratton 10-inch subwoofer, has a 200-watt amplifier with 400 watts of peak power, hitting the sweet spot of energy,

size, control, features, and cost. KLH subwoofers thrill movie fans and audiophiles alike with their rich, expansive sound. Once you add a Stratton to your home theater or music system, you will feel these ground-breaking subwoofers down to your core.
