

STORY

Center Channel Speaker

We named it after an important street in Cambridge, but the Story Center channel speaker does exactly what the name says. Most of the dialog in your movies comes from the center channel, so make sure the one you choose meets your expectations, from the low purr of a leading actor's subtle dialogue to the howl of your favorite action hero. Every

movie tells a story, and every Story Center channel brings your movies to life. The Story is timbre matched to all KLH loudspeakers, excluding the Model Nine, so you'll get the perfect match between left-center-right for the complete home theater experience. It features the same quality drivers, tweeter, and components used throughout the KLH line.

SPECIFICATIONS

Story Center Channel Speaker
